**Subject:** Re: Cooperating Agency Comments on Scope of New Recirculated Draft EIR/EIS

*Richard. I understand that you talked with Reclamation staff recently regarding the BDCP supplemental document. As you know, a meeting will be held in December 2014 to discuss your concerns as well as other cooperating agencies. We look forward to meeting with you and moving forward. Please let me know if you need any additional information at this time.*

*Thanks*

*David G. Murillo  
Mid Pacific Regional Director  
Office # 916-978-5000*

Dear Director Murillo:

Please find attached a letter from four BDCP Environmental Coordination Team (BECT) cooperating agencies regarding the scope of the proposed partially-recirculated Draft BDCP, Draft EIR/EIS, and Implementing Agreement. It is our understanding that the California Department of Water Resources (DWR) plans to announce the scope of the partially-recirculated draft documents this November.

As cooperating agencies, we respectfully request immediate coordination on the specific topics and technical elements that will be recirculated, as well as an opportunity to make comments on any new drafts before they are released to the public. The attached letter contains our initial suggestions on what the scope of the recirculated Draft EIR/EIS and associated documents should encompass.

If you have any questions, please contact Osha Meserve at (916) 455-7300.

Richard Denton
